

Bears Made a Short Raid.

But a Reaction Set In and Bulls Carried the Day.

Easy Money Brings Renewed Activity to the Street.

The receipt of lower quotations from London induced the bears to hammer the market at the opening, and prices yielded 21 to 23, the latter in sugar, which touched \$91.2.

There was further realization right through the list by the smaller class of traders, but the stocks sold fell into strong hands, and pretty soon the market again proved to be the leader and jumped 23 to 22 1/4.

FALL RIVER, Mass., Sept. 11.—The Empire State Knitting Mills resumed work to-day after a week's stoppage, and the men insisted that manufacturers of woolens and underwear also reopened operations to-day, with a full complement of men.

SCHENECTADY, N. Y., Sept. 11.—The Empire State Knitting Mills resumed work to-day, after a week's stoppage, and the men insisted that manufacturers of woolens and underwear also reopened operations to-day, with a full complement of men.

SPRINGFIELD, Mass., Sept. 11.—The Whately Malleable Iron Works started up this morning with 200 hands. More will be put on to a total of 250.

NEW YORK, Sept. 11.—The Whitehall Foundry Works started up this morning with 200 hands. More will be put on to a total of 250.

CHICAGO, Sept. 11.—The Electric Light & Power Co. has increased its rates 25 per cent. The New Jersey Central has raised its rates 10 per cent. American Cotton Oil Co. has raised its rates 10 per cent. Chicago & Eastern Illinois has raised its rates 10 per cent. The steamship La Gasconne brought gold valued at \$3,62,000 francs, consigned as follows: Heidebach, Iselkraut & Co., 100,000 francs; August Belmont & Co., 825,000 francs; Hirsch, Wood & Co., 16,000 francs; and Miller, Schiff & Co., 2,900 francs.

The market was strong, with the main strength with further advances in a number of instances.

The bears had a good deal of stress on them, but it did not avail them much, and they were forced to cover up their losses.

The particularly strong stocks were Missouri Pacific, Lackawanna, National Cargas, Manhattan and Wheeling & Lake Erie, all of which showed a pressure of quotations from any instances.

The monetary situation continues to improve. Call loans were done at 3 to 4 percent, and the clearing-house companies offered 350,000 outstanding certificates, leaving certified checks on clearing-house banks in payment of duties. This rate is doubtless due to the fact that the banks are now above their legal requirements.

The Sub-Treasury had debt balance at the clearing-house this morning of \$2,000,000, and the amount held in gold in coin, \$3,973 in United States notes and \$30 in Treasury notes.

The public is taking hold, and although the market is more outside business than for some time.

The improvement in money matters and the belief that the amount of outstanding certificates of deposit materially reduced during the current week helps the upward movement shown to-day. Towards the close there was little pressure to sell for the long session.

The last deal of mystery surrounds the call out specifications.

The so-called talents in the Board of Trade have continued advancing, being unable to discover where the large buying of lessors came.

The public is taking hold, and the market is more outside business than for some time.

The improvement in money matters and the belief that the amount of outstanding certificates of deposit materially reduced during the current week helps the upward movement shown to-day. Towards the close there was little pressure to sell for the long session.

Toronto, Aug. 30, will ship 20,000 ounces of silver, Hand & Harman 25,000, and Summers and Zimmerman 20,000 dollars of the Specie bullion to-morrow. The Treasury Department purchased the amount offered each day for 30 days. The total sales of stocks were 51,200 shares; silver certificates, 25,000 ounces, in the bullion department; 6,200 shares of sugar and 2000 head were traded in.

The Closing Quotations.
